AUDIT DELIVERABLE

STATEFLUX EXECUTIVE FLEET SECURITY POSTURE REPORT

Empirical, cryptographically grounded evaluation of IPsec configurations, negotiation space frontiers, and deterministic change outcomes.

Generated Date:	29 September 2026
Scope:	40 IPsec Tunnels • 20 Gateway Endpoints
Validation Environment:	strongSwan 5.9.8 • Libreswan 4.12
Report Identifier:	rep-exec-20260929145158

CONTROLLED TESTBED REPORT • HIGH ASSURANCE DELIVERABLE

1. Executive Summary & Fleet Posture

STATEFLUX Executive Summary: Fleet cryptographic posture is evaluated as DEGRADED. 23 of 40 tunnels meet modern Suite-B standards. 13 tunnels exhibit dormant negotiation floor exposure, leaving connections vulnerable to downgrade attacks despite strong active suites. Immediate priority: prune legacy 3DES and DH 14.

Total Tunnels:	40	Suite-B Compliant:	23
Critical Exposures:	2	Weak Floor Risks:	13

2. Strategic Executive Recommendations

- Priority 1:** Enforce mandatory AES-256-GCM across all high-degree hub gateways.
- Priority 2:** Prune legacy fallback proposals from branch configuration templates to eliminate floor gaps.
- Priority 3:** Execute Phase 4 staged rollout waves to prevent unexpected rekey outages.
